

30° Asymmetrical Beam Antenna

HORN ANTENNA WITH N-FEMALE CONNECTORS

The radiation pattern of 30° Asymmetrical Horn CC Antenna is 30° wide in the azimuth plane and 20° in elevation. Increased gain and high beam efficiency greatly improve coverage planning options.

30° Asymmetrical Horn CC Antenna exceeds the traditional patch array sector antennas thanks to the high stability of the radiation pattern throughout the bandwidth of operation. Outstanding noise rejection and precision of the radiation pattern favor the antenna for high-density access point clusters and densely co-located sites. 30° Asymmetrical Horn CC features a pair of N-female connectors ensuring a wide range of radio connectivity.

Asymmetrical Horn antennas were awarded WISPA Product of the Year 2019, 2020 and 2021 Awards.
